

Project Plan

Project Title

Explore the World: The Guide to Countries and Cultures

1. Project Description

The project involves creating an informational webpage about countries and cultures around the world using HTML only. The webpage will introduce different continents, countries, cultures, and interesting facts while organizing the information in a clear and engaging way.

2. Objectives of the Project

The goals of this project are:

- To practice my skills on HTML.
- To showcase everything I have learnt so far.
- To learn how to use multiple HTML tags together.
- To create an organized and clean webpage.
- To present information about different countries and cultures.

3. Concepts That Will Be Used

The project will apply the following HTML topics learned in Phase 1:

- HTML fundamental topics:
 - Semantics
 - Entities
 - Symbols
 - Elements
 - Attributes
- Tables
- Lists
- Formatting

- Form

4. Project Features

The Webpage will include the following features:

- Sections and articles about different countries and continents.
- Tables to compare information about different countries.
- Lists to organize facts, landmarks, foods, languages, and other information.
- Images to give readers a visual understanding of different countries and cultures.
- Links to provide additional information about countries and destinations.
- A form where users can share their travel preferences.
- Radio buttons for selecting a favorite continent.
- Checkboxes for selecting preferred types of destinations.
- A dropdown/select menu for choosing options.
- A text area where users can describe their dream destination.
- A submit button for the form.

5. Basic Project Structure

Step 1:

Introduction

Step 2:

Continents

Step 3:

Countries and Cultures

Step 4:

Country Comparison

Step 5:

Images and Links

Step 6:

Travel Preferences Form

Step 7:

Conclusion

6. Example Tags

Tags that will be used:

`<html>.....</html>`

`<head>.....</head>`

`<title>.....</title>`

`<body>.....</body>`

`<table>.....</table>`

`<form>.....</form>`

`<h1>.....</h1>`

(maybe:) `<aside>.....</aside>`

7. Possible Challenges

Some possible challenges may include:

- Text not appearing properly.
- Tables and forms looking scuffed.
- Incorrect heading tags.
- Using wrong tags.
- Accidental typos.
- Forgetting closing tags.

8. Expected Output

The expected output would be a properly working and organized informational webpage about countries and cultures around the world. The webpage should demonstrate the HTML topics learned in Phase 1 and correctly display text, images, tables, lists, links, and forms without major errors or typos.
